

Reading RaptorMed Treatment Sheets

RaptorMed is our digital patient tracker. Each day we print treatment sheets for our birds that will change week to week. Learning to accurately read these sheets and fill them out will be a vital part of your position.

Find on your treatment sheet

Treatments are broken down into how many different times a day they are treated.

SID – Once a Day. These are our **Diurnal** or **Nocturnal** birds.

BID – Twice a Day. These birds are treated twice a day. This is to space out medications or to ensure that birds are being fed multiple times a day.

Can you think of a reason a bird might need to be fed more than once a day?

Find a bird that is BID and a bird that is SID, what is their patient ID number.

BID

What kind of bird is your BID patient?

What kind of food does it eat?

How much food should you feed?

Are there any medications to give?

_____ g

YES / NO

Is this bird a bird you are grabbing or not? Where should the medication go?

YES / NO

In the Food / On the side

SID

What kind of bird is your SID patient?

Where does your bird live?

How much food does this bird need?

_____g

What kind of food does it need?

Does your bird need to be exercised?

YES / NO

How many lengths should it fly?

_____ --- _____ x

Measuring with a syringe

Measure out the following liquids with your syringe.

0.05cc

0.28cc

0.51cc

Recording Data on RM Sheet

Preparing Food

Use your scale to weigh our food for your SID and BID patient. Record that information on the RaptorMed Sheet.

Review bird videos.

Use the Bird Behavior Feeding Guide to add notes about your feeding.

Are there any leftovers?
