

File Sharing Protocol

CRC Photography Volunteer

You will share your image files with the Carolina Raptor Center via **WeTransfer** at:

<https://we.tl/r-34UfCT2SRS>

Note: WeTransfer only accepts files, not folders. You can only send up to 200 GB of files through WeTransfer. If you are sending more than 200 GB, send images in groups.

RAW Images

After choosing your final images, save them as raw files (.RAW, .CR2, .CR3, etc.) in a sequence named as **MMDDYY_ProjectName_LastNameFirstName-#**.

For example, if your name is John Smith and you photographed STEAM Day on April 5, 2025, you should name your images as 040525_STEAMDay_JohnSmith-1, 040525_STEAMDay_JohnSmith-2, etc.

Edited Images

If you choose to also share edited images, ensure they meet CRC's editing style to be true to life. Export these images as high-quality JPEGs with the same naming structure as raw images, but with "-edited" before the sequence number.

Continuing the above example, you would name edited images as 040525_STEAMDay_JohnSmith-edited-1, 040525_STEAMDay_JohnSmith-edited-2.
